Home Learning Ideas

Year 6, Week beginning: 1st February 2021

English: Remember to think carefully about what you are going to write before you start! Capital letters and full stops ARE important. Remember to use spelling and grammar rules that you have learnt this year so far in your writing.

Inspiration for the week: Persuasive Letter

This week will be exploring persuasive techniques by writing a letter to our school PE co-ordinators to encourage them to buy fair-trade footballs in the future.

Maths

Remember to keep learning and practising your times tables – you should be logging on and completing a session of TTRS EVERY day.

<p><u>Session 3:</u> A theme in traditional storytelling is 'call and response': the storyteller says something, and the audience replies with a response. We are going to do this, but with actions. Create an action for each of Anansi's sons.</p>	<p><u>Session 3: Planning a persuasive letter</u> Use your notes on fair-trade footballs and the powerpoint/planning resources on Google Classroom to help you plan your letter. Remember to use the correct level of formality and think about your letter layout.</p>	<p><u>Session 3: Using formal written methods for short multiplication, including multiplying decimals</u> Today's lesson focusses on applying our multiplication skills to calculations involving decimals. Here is the link: https://classroom.thenational.academy/lessons/use-formal-written-methods-for-short-multiplication-including-multiplying-decimals-6rvp2r</p> <p>Today's 2 chilli challenge involves a pasta making machine (and decimals!).</p>
<p><u>Session 4:</u> Create your own oral retelling of the Anansi story, with actions and responses and share this with your family.</p>	<p><u>Session 4: Drafting a persuasive letter</u> Draft your letter using your plan, the correct letter layout and the other resources we have used this week to help you. Assess your work using the self-assessment document on Google Classroom. Have you included everything you needed to?</p>	<p>There are some more decimal word problems in the 3 chilli challenge.</p> <p>If you need some more practice multiplying decimals by a whole number using the area method (grid method), take a look at the 1 chilli challenge today!</p>
<p><u>Session 5:</u> Why not enjoy some more Anansi stories today? Follow the links on Google Classroom or see if you can find out about any more of his stories. What do they all have in common?</p>	<p><u>Feel Good Friday</u> So we have learnt about lots of different fair-trade products from bananas to footballs! Now it's your turn....Create your own fair-trade product. It could be a cereal bar, a smoothie or even a brand of fair-trade clothing. Design packaging and advertising for your product. You can come up with a logo, a slogan or a sales pitch to promote your product....</p>	<p><u>Session 4: Multiplying by a two digit number using long multiplication</u> The last lesson in this unit gives us the chance to remind ourselves how to multiply by two digit numbers, including decimals. Here is the link: https://classroom.thenational.academy/lessons/multiply-by-a-two-digit-number-using-long-multiplication-75k3cc</p> <p>All 3 chilli challenges today require you to do some estimating before calculating the answers. Which method will you use...?</p>

Spelling Practice

You will be sent your weekly spelling list on Google Classroom. Complete the activity for each day and then ask a home grown up to test you on Friday.

Mon: Find the definitions

Tues: Write a spelling story

Weds: Spelling pyramids

Thurs: 2-minute spelling challenge

Fri: Vowels, consonants and syllables

Art: Anansi spider webs

This week our art is inspired by the Anansi stories. Create a spider web by experimenting with patterns and lines, based on African art. You can even make an Anansi spider to put onto your web!

Science

This week we will explore different non-contact forces, including gravity and magnetic force. Work through the Oak Academy lesson and have a go at the activities.

<https://classroom.thenational.academy/lessons/what-are-non-contact-forces-6djkgd>

RE: How do the belief of Christians affect their actions?

Last week, you did some research into some Christians who made a significant impact in the world.

In the PowerPoint in Google Classroom, read the extract from Matthew's gospel. Think about how those Christians tried to follow these examples.

Jigsaw: Different Dreams and Goals

Compare the similarities and differences of the aspirations of young people from different cultures. Create a 'dreams and goals tree' for yourself and then create another tree for a child from a different culture or country (maybe a child whose family works on a fair-trade farm?)

PE

There are many links on this website that show you how to keep fit and have fun at home and in your garden.
<https://www.nhs.uk/change4life/activities>

Get active and practise your times tables at the same time...

Topic – Geography: Fairtrade cotton

Watch the 'Unravelling the thread' film and design a T-shirt promoting facts and fair-trade messages about the cotton industry. Is there anything about cotton production that has surprised or shocked you?

There is a T-shirt template to help you on Google Classroom or you can draw your own. Or, if you have an old T-shirt that needs recycling, you could even use this instead!

<https://schools.fairtrade.org.uk/teaching-resources/unravelling-the-thread/>

Please record all of your English and Maths learning in your Home Learning Journals. Your teacher will collect these in when you return to school. Please remember to draw a margin in your maths book whenever you start a new page and ALWAYS present your work neatly.

Remember to check your Google Classroom each day for the option to send photographs of your assignments. Your teacher will send feedback once they have received your photographs.
