

Next half term, come with us as we

Step Back in Time

to the land that time forgot.

Where we will walk in the footsteps of

Jurassic Giants!

The footprints of these incredible creatures can still be found today, and they hold many secrets of the past.

Over the Christmas holidays, we would like you to investigate the footprints, pawprints or even claw prints that you find in your local area.

You could make paint footprints or draw around all the different feet in your house! Perhaps you could take photographs of or draw the paws and claws of your pets.

If you visit the beach or the park, what tracks can you spot and who or what do you think made them?

We can't wait to see what you discover!
